

K-12 School Districts and Universities rely on Capital Project Management Solutions to help monitor expansion programs

Increase project visibility, create accurate budgets, generate contractor payments, gain control of project costs and reduce delays.

Capital Project Management

The management of Capital Improvement Programs (CIP) for K-12 and Universities has become critical as educational institutions across America invest in capital expansion programs including school improvements and new construction projects.

Challenges

- Cumbersome budgeting and bid management process
- State and Federal documentation requirements
- Lack of access to timely information
- Payment Conflicts

Accurate Project Budgeting

Prepare accurate Estimates

- Increase Project Visibility
- Improve Accountability
- Control costs
- Reduce delays
- Collaborate in real-time
- Manage contractors and sub-contractors

Streamlined Program Management

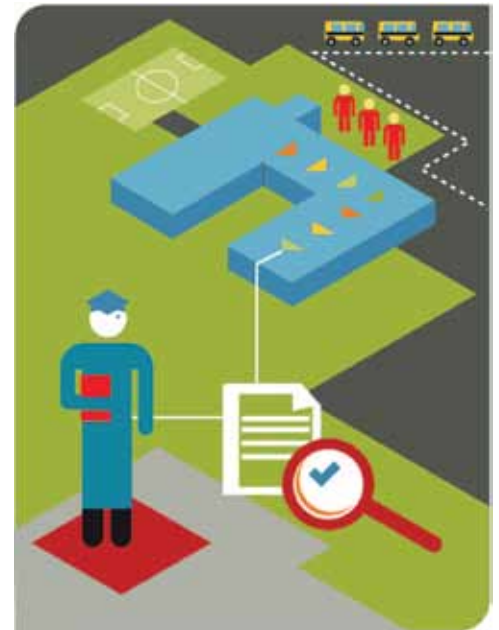

Accurately track Project Progress

- Track and manage critical assets
- Monitor project progress
- Generate contractor payments
- Manage change orders, and communications
- Online document collaboration

Enterprise Dashboards

At-a-glance views of a project's true status

- Role-based Key Performance Indicators
- See project schedule & budget Status
- Drill down to see detailed information

Aurigo BRIX is a comprehensive Web based capital project management system that provides a world class Web 2.0 technology framework completely built on Microsoft technologies to automate the entire lifecycle of a capital project; starting from land management, project cost estimation, planning, project monitoring, contract management, site inspections, asset maintenance and even asset disposal.
