

## Use technology to expedite commissioning and management of power plants

*Increase project visibility, create accurate budgets, generate contractor payments, improve site monitoring, manage regulatory compliance, and deliver projects faster!*

Use a single robust, scalable system to integrate your process workflows and provide for a 360 degree automation platform. Instill a control mechanism on complex plant operation processes.

### Challenges

- Plant output and availability
- Asset maintenance and inspections
- Managing subcontractors
- Site safety compliance
- Control on contract items
- Lack of a digital inspection system

### Accurate Project Budgeting

Prepare accurate estimates

- Increase project visibility
- Control costs
- Reduce delays
- Manage contractors and sub-contractors

### Streamlined Contract Management

Tailored to meet your needs

- Track and manage critical assets
- Generate contractor payments
- Manage change orders and other product documentation

### Plant Operations

Automate site monitoring

- Digital data capture and jobsite photos
- Digital inspection logs
- Regulatory compliance management
- Manage site safety

### Enterprise Dashboards

At-a-glance views of a project's true status

- Role-based key performance indicators
- See plant operation statistics
- Detailed information drill down

*"The combined solution of Aurigo CPMS and Microsoft Dynamics AX has provided us with a holistic solution to our ERP requirements. We see increased operational efficiency and greater project visibility through this implementation."*

Vybhav Shetty, Executive Director,  
SNC Power Corp

Aurigo CPMS is a comprehensive web based Project Management & Plant Monitoring System that provides a world class web 2.0 technology framework completely built on Microsoft technologies to automate plant construction and management; starting from land management, project cost estimation, planning, project monitoring, contract management, site inspections, asset maintenance and even asset disposal.
