Shipbuilding Operations

Automate site monitoring

- Digital Data Capture and Jobsite Photos
- Digital Inspection Logs
- Regulatory Compliance Management
- Manage Site Safety

Enterprise Dashboards

At-a-glance views of a project's true status

- Role-based Key Performance Indicators
- See Multi-Block Schedules
- Drill Down to see detailed information

Aurigo has successfully completed a comprehensive Business Process Study at Vizag Port Trust spanning ten business divisions and over sixty five sections including port operations, railways, estate management, civil and mechanical engineering. It included capturing the AS-IS and TO-BE business processes for the entire port to significantly increase its efficiency.

Aurigo BRIX is a comprehensive web based Ship Building & Repair System that provides a world class web 2.0 technology framework completely built on Microsoft technologies to automate ship construction and repair; starting from project cost estimation, planning, project monitoring, contractor administration, digital inspections and asset maintenance.
