

aurigo® INDUSTRY READY ERP

Integrated Solutions that Deliver Powerful Insight and Intelligence to Enterprises

Aurigo's world class Industry ready ERP solutions for Infrastructure owners, PMC firms and General Contractors help monitor and track capital projects in addition to running business operations seamlessly.

Feature Summary

- Deploy vertical functionality quickly and with reduced risk
- Provides 360 degree visibility into your business
- Designed to be quickly adopted by employees
- Molded to suit individual business processes, not the other way round.

Business Challenges

- ERP platforms only automate 4 Ms (men, machines, material and money) of a business
- Lack of automation for standard construction project management processes
- Disconnect between standard ERP and project management systems
- Longer implementation cycles incurred during customization of generic ERP systems
- High Total Cost of Ownership

Aurigo's Industry Ready ERP solutions

- Seamlessly integrate core construction management processes with standard ERP processes and workflows
- Can be rapidly configured to meet any capital project organization's unique business challenges including customized reporting and specific workflows
- Erases boundaries between data silos and delivers the critical information needed for rapid, effective decision-making
- Comes with business ready reports for capital projects
- Flexible workflow engine supports

- orchestration of more than 100 different forms
- Helps manage complex business processes without the burden of a large, expensive information technology (IT) infrastructure

Power of Top Class ERP Platforms

- Leverage power of world class ERP platforms (Microsoft, SAP, JD Edwards or Oracle) without compromising on industry specific features
- No more relying on siloed, homegrown solutions that lack latest feature sets and lock in historical data
- Top class ERP platforms are always on cutting edge of technology advancements, and exciting new enterprise features

End-to-End Integrated solution

- Process automation of estimation, bid management, contract management, field inspections and facility management
- Ready connectors to ERP systems, scheduling applications and document management systems
- Awarded distinctive CFMD status
- Aurigo works with the best educational & research institutions to develop user-specific features that reflect industry best practices
