

Automate Budgeting with Aurigo

Aurigo is a leading software product company providing web based solutions for Capital Project and Program Management (CPMS), Facilities Management, Real Estate and Construction Management. Our software product suite BRIX automates the processes of project cost estimation, electronic bidding (tendering), contract management, facilities management, asset management, real estate operations and field inspections. Our customers include state and local government agencies, private owners, corporate entities, repeat builders large construction management firms, general contractors, transit authorities, utility companies, school districts power plant contractors, ship building & repair companies and real estate developers worldwide.

addresses this need elegantly and supports all major ERP platforms including Microsoft Dynamics and SAP. It also integrates with other legacy and third party applications using XML and web services technologies. Investing in BRIX is a smart way to leverage your existing IT investments even more.

Aurigo is a Red Herring 100 company and has been awarded as being amongst the most innovative companies in the world by Microsoft. The company is a private equity funded Delaware corporation with offices in New York (United States) and Bangalore (India). Our products are available both directly and through a select partner network in the United States, Canada, Middle East, Africa, Asia and India.

The Aurigo Advantage:

With Aurigo BRIX 2009, Now you can seamlessly integrate your capital program management

and construction management software into your existing IT environment including ERP. Standard ERP platforms have been designed for the manufacturing industry and automate the 4 Ms of a business (men, machines, material and money) and do very little to automate budgeting (cost estimation), tendering, plant & machinery, contract management and digital progress monitoring. Thus ERP systems by themselves fail to automate these processes causing a lot of manual play causing cost escalation and time delays. BRIX

Balaji Sreenivasan is the President and CEO of Aurigo. Balaji co-founded Aurigo in the year 2003 and has played a key role in growing Aurigo's business

and global market share and helping provide value to our customers. Having successfully closed Aurigo's Series A round of funding, Balaji invests valuable time in building strategic relationships with customers, partners and resellers across the world to continually increase the product's market share and enter new geographies and markets. Balaji completed his bachelor's degree in Engineering from NIT Trichy and masters at the University of Florida, Gainesville. Balaji is a member of the TiE (The Indus Entrepreneurs) - Bangalore chapter.
