Pune: To enable construction industry to tackle its information and data process more efficiently, and give construction engineering students the much-needed exposure to global ERP (Enterprise Resource Planning) practices, a first-of-its-kind construction ERP Lab in India, was inaugurated by National Institute

of Construction Management and Research (NICMAR), Aurigo Software Technologies and Microsoft at the NICMAR campus.

“Inclusion of construction ERP software will help construction management students access a global ERP solution and let them have a hands-on lab experience,” said Founder of Aurigo Software Technologies Balaji Srinivasan.
