Unsurpassed monthly

I regularly read CW and think it is the best amongst all the present construction magazines both in terms of its accurate technical content and various national and international products and construction machinery.

Shabbir Kanchwala, Vice President (Project Coordination), K Raheja Corp

More info on latest techniques

I'm really happy with the CW editorial team for their team effort. The June issue was very informative. But, adding to the content, I would also further want to know the latest construction techniques. I know of a house that was built somewhere in one day and I found that commendable. In the same manner, I feel you could also feature some more data on such latest techniques.

Balaji Sampath Srinivasan,

Asst General Manager, ReGen Powertech Pvt Ltd

Interesting read!

The magazine is a

conglomerate of new inventions, setbacks, events and projects in the construction industry. Precisely, it has what is required for this segment. The cover story on roads and bridges in the May 2010 issue was highly informative. Look forward to reading more articles on the same lines.

Balaji Sreenivasan,
CEO, Aurigo Software Technologies Inc

Comprehensive output

I am very happy with the write-ups covered in the magazine. CW persistently focuses on the latest projects and technologies in the construction industry.

It provides an excellent product line for the architects. It's well designed and easy to read. The articles are precise and well edited and I am very happy with the productivity. Well done!

Subash Gogia,
Director, Gogia Interior Services Pvt Ltd, Alibaug

A commendable package

CW encompasses all the articles that one would look for in the construction industry. I also like your rating system for the Architect and Builder Awards. I see no requirement for change in content and type of topics covered. Keep up the good work and all the best to the editorial team.

S Subbiah,
Senior Architect, CR Narayana Rao Architects

Opinion Poll Result

Which is the best infra opportunity?

- Roads [20%]
- Airports [6%]
- Housing [6%]
- Urban infra [12%]
- Ports [3%]
- Power [52%]
