

AI-native capital planning platform

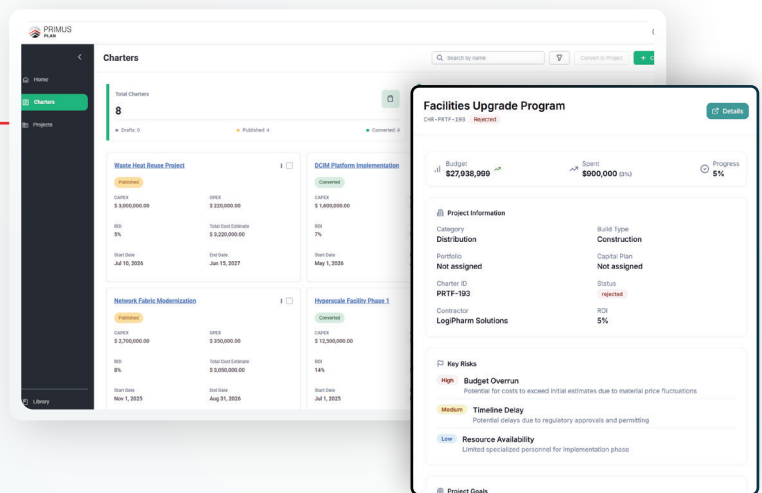

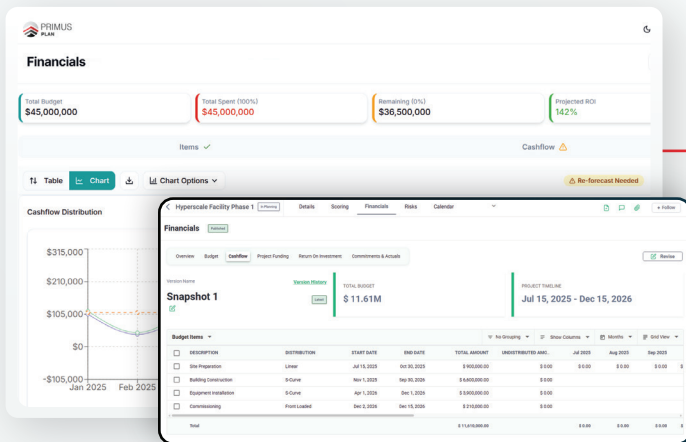

Prioritize the right projects, manage funds, and maximize ROI

Aurigo Primus is an AI-native capital planning platform to prioritize the right projects, manage funding, and maximize ROI across complex multiyear programs. It supports facility owner-operators with strategic, upstream decisions and connects planning with construction, using actual project data to improve visibility and continuously inform future investments. With AI built directly into workflows to assist, predict, and execute, so you can plan, allocate funds, and compare scenarios with confidence.

PLAN | Smarter capital allocation

Prioritize the right projects—and fund them with confidence

Capture the right investment opportunities using a common framework aligned to business goals and early-stage ROI.

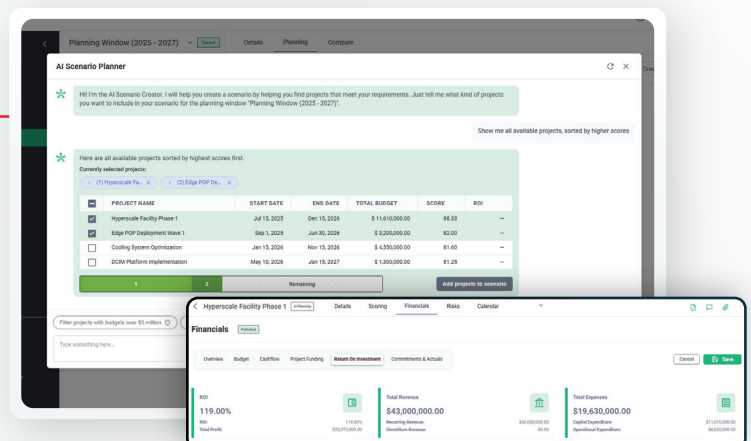

Get a comprehensive view of your project financials

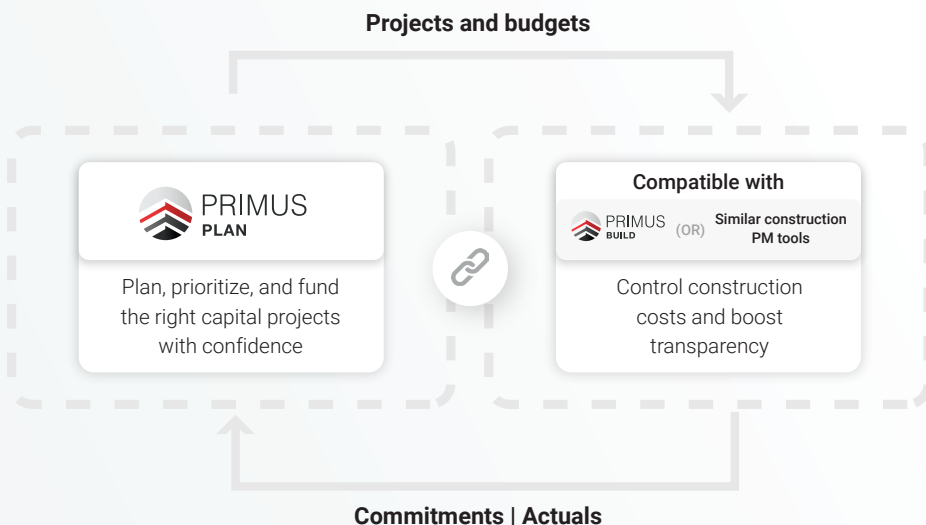

Define project budgets, forecast costs, and assess risk to **drive smarter investment decisions**.

Maximize ROI across multiyear plans

Use **AI scenario planning** to group and prioritize projects, visualize cashflow projections to drive better financial outcomes.

Primus Plan integrates with Primus Build or your existing construction project management tools to ensure a seamless flow of data from long-term planning through project execution. Funding decisions carry forward into delivery, while actuals and commitments sync back—keeping plans accurate, actionable, and giving teams real-time visibility into progress.

Why consider Aurigo Primus Plan?

Accelerate capital deployment without losing financial control

Move faster on investments while maintaining control across multiyear plans and budgets.

Identify risks and gaps early in long-range plans

Surface risks and planning gaps upfront, so decisions are proactive, not reactive.

Unify planning, funding, and execution in one platform

Connect decisions across the life cycle, so plans stay aligned from strategy to delivery.

Make every capital decision defensible and auditable

Ensure decisions are compliant, traceable, and backed by data, so stakeholders stay aligned.

AI that turns planning decisions into action

Assist, predict, and act within workflows, so teams move faster, reduce risk, and keep plans on track.

Built for capital program owners across data centers, energy & utilities, manufacturing, and life sciences. Aurigo Primus Plan enables capital planning, budgeting, and portfolio management using AI scenario planning and ROI-based prioritization, while staying in sync with execution.
