

City of Scottsdale Selects Aurigo Masterworks To Help Manage Cross-Departmental Capital Projects Amid Burgeoning Growth

The City of Scottsdale recently made headlines for hosting Super Bowl 2015, but The City's been making headlines for years by winning prestigious awards and recognitions, including the number six spot on 27/7 Wall St.'s "Best Run City in America" in 2014. In keeping with its discerning reputation, Scottsdale had high standards when selecting a capital program and project portfolio management software solution.

The CPM department is tasked with planning and execution of community facilities, drainage and flood control, preservation, public safety, service facilities, transpor-

The City of Scottsdale Capital Project Management Department (CPM) manages an average of 100 projects per year with a \$1.5 billion five-year capital program between 2014 and 2019 that includes linear and non-linear construction.

tation, and water management. The city maintains 185 square miles of road, 2,079 miles of water mains, 1,429 miles of sanitary sewers, 88 miles of storm sewers, and more than three million square feet of city facilities.

A Complex Entity Pursuing a Simple Solution

When the City of Scottsdale looked for the perfect capital project management solution, they had five different areas that needed attention: Project Management, Right of Way, Leasing, Civil Engineering and Construction Coordination; all of which need consistent tools to manage projects. The City issued an RFP in October 2013 in search of a single, cohesive enterprise solution to streamline and automate its planning, document management, and reporting processes across all teams and projects.

With Aurigo Masterworks delivered over the cloud, the city will achieve both short and long term goals, which include: tracking project budget and schedules; creating project-based and cumulative cash flow forecasts; routing documents using workflows; accessing and uploading documents from mobile devices; customizing their own forms; tracking right of way acquisitions and leases; and sharing project documents with external stakeholders. Aurigo Masterworks is also being integrated with the City's accounting software, SmartStream General Ledger.

The City of Scottsdale maintains:

- 185 square miles of road
- 2,079 miles of water mains
- 1,429 miles of sanitary sewers
- 88 miles of storm sewers
- More than 3 million square feet of city facilities

Aurigo Masterworks will enable the City to:

- Track project budget and schedules
- Create cash-flow forecasts
- Route documents using workflows
- Access and upload documents from mobile devices
- Customize forms
- Track right of way acquisitions and leases
- Share project documents with stakeholders

Aurigo: Best Vendor on All Counts *Phased Implementation Plan*

Of the eight vendors that submitted proposals, three teams that scored highest on evaluation criteria—functionality, technology, business issues, and pricing—were shortlisted to demonstrate their products. Final tabulations of both the proposal and demonstration phases show Aurigo scored the highest on all counts, followed by e-Builder and Hill International at a distant second and third place.

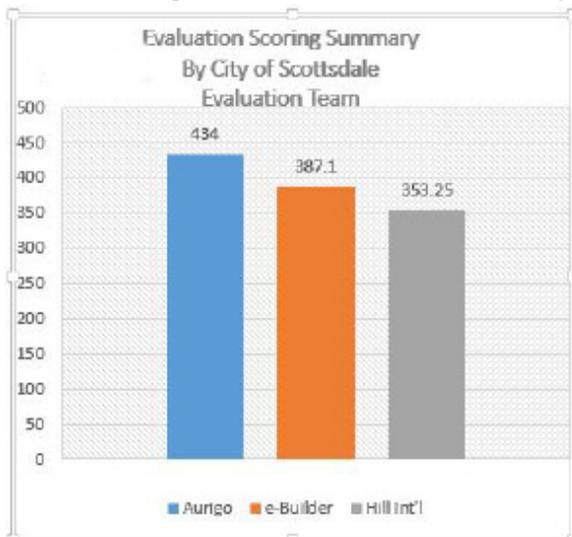

Aurigo stood out from its competition because it provides its customers with more than just project management software. Aurigo’s entire solution: software, services, training, support, upgrades and maintenance provides a consultative engagement model to help City of Scottsdale optimize its business processes.

In collaboration with the City, Aurigo developed a mature and phased 9-month implementation plan to meet all of Scottsdale’s objectives stated in the RFP. Using the methodology Aurigo Connected Methods, the Aurigo Masterworks Software as a Service (SaaS) model was specifically crafted to address CPM’s complex organizational needs.

Schedule a Free Assessment Workshop

State and local government agencies have complex needs that mirror those of the City of Scottsdale. Their capital improvement projects are difficult to plan and manage because there is no single solution that streamlines and automates the entire lifecycle. A lot of point solutions create a bigger mess.

The City of Scottsdale, plus 900 other organizations, are now planning and delivering over \$250 billion of capital programs using Aurigo Masterworks. To learn more about how your organization can make the entire capital project lifecycle easy, contact Aurigo at (631) 824.4042 or write to us at sales@aurigo.com to schedule a free assessment workshop, and experience how Aurigo Masterworks can help you meet your short and long term goals.

Scores are from documents obtained via City of Scottsdale open records.

Five areas needed consistent tools to manage projects:

- Right of Way
- Project Management
- Leasing
- Civil Engineering
- Construction Coordination

Implementation

Aurigo Masterworks will be implemented using a phased approach over 9 months.
