

# Plan, build and renovate hospitals with confidence

## Planning to build a new regional hospital or remodeling your existing facilities? Are you juggling maintenance projects while supporting ongoing operations?

Building or renovating a hospital wing or healthcare center is a complex capital program that will impact long-term community health – and your bottom line. Your capital planning involves both private and public agency stakeholders, often with competing interests. And you must ensure patient safety during active maintenance and construction projects.

**aurigo<sup>®</sup>**  
**ENTERPRISE**

*All-in-one portfolio planning and construction project management solution for expanding businesses*

---

**Portfolio Planning + Construction Management**

✓ Portfolio Planning	✓ Estimation & Bidding
✓ Forecasting	✓ Project Management
✓ Project Financials	✓ Contract Management
✓ Document Management	✓ Field Management

## Businesses and organizations across North America are planning, spending and building more efficiently, reducing project risks, and ensuring projects are delivered successfully with Aurigo Enterprise Cloud

### Operate Efficiently

- **Increase productivity by 30%-70%** with digital data collection and business process automation.
- **Eliminate paper forms** with mobile-first data collection, even when users out in the field aren't connected to the Internet.
- **Finish projects faster** and minimize the risk of cost overruns.
- **Save money** with increased visibility, schedule control, risk management, and reporting.

### Reduce risks

- **Ensure projects are delivered on time and on budget** with full lifecycle construction project management.
- **Prevent cost overruns** with automated estimations, bidding, scheduling and contract administration.
- **Get notifications** when there are issues with any project, asset, contractor, or payment.
- **Increase transparency** with an official system of record for every project, stage, and dollar spent.

### Ensure project success

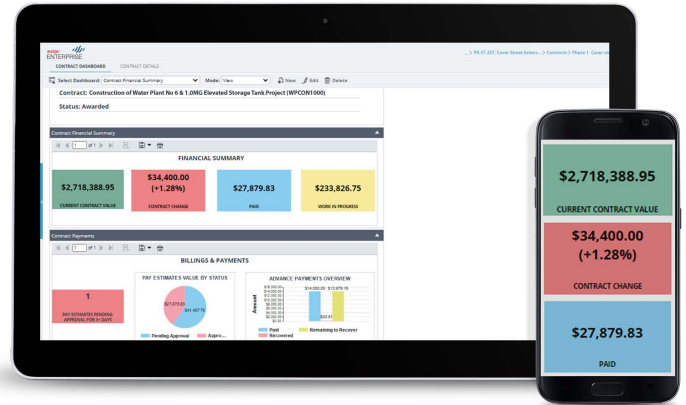

- **Use an all-in-one solution** that addresses every phase of the project.
- **Get visibility** across all projects as well as into the minute details of each one.
- **Ensure your capital assets are properly maintained** after completion for long-term safety and success.
- **Leverage Aurigo's 15 years' experience and expertise** helping capital project owners successfully plan, build and maintain their buildings and infrastructure.

**Aurigo provides a family of cloud products for hospitals and healthcare systems across North America.**

With **Aurigo Enterprise** and **Aurigo Masterworks Cloud** you get an integrated solution to manage every aspect of your capital planning and construction management process – from calculating estimates and running the bidding process, through awarding the construction contracts and managing change orders from the field.

Aurigo Enterprise helps companies prioritize and deliver every construction project on time and on budget with an all-in-one cloud solution that is easy to deploy and easy to use.

- A **complete solution** to manage all the nuances of your public-facing construction and maintenance projects in one unified system.
- A **modern solution** that is built 100% in the cloud, deploys quickly, and can be used from any mobile device or browser.
